The Recruiter's Business Case for Surge Recruitment Outsourcing

Background

Succeeding in the federal contracting market requires an agile and innovative organization. One of the biggest issues facing contractors is the ability to deliver sufficient quality talent in a timely manner. This can become an enormous risk for organizations that need to grow by 20% or more. This surge in hiring may overwhelm an organization and damage their reputation in the federal contracting space.

Many organizations have asked if there is a more efficient, effective and low risk way to manage surge hiring?

SG2's Surge Recruitment Outsourcing Talent Platform

In the federal market, the demand for turn-key human resource solutions has always been present. This, along with the organizational risks of surge hiring, has driven federal contractors outsource their hiring needs to specialized talent platforms.

To achieve the required results, a tailored talent acquisition process is applied. This is one that works with your organization's existing policies and processes. Additionally, SG2's focus on daily sprints leverages your existing capabilities which enable your organization to deliver the right talent just-in-time for your contract award.

Talent platforms offer unique attributes and capabilities that most organizations do not possess, including:

- Active and addressable talent pools that matches the job and organizational requirements;
- Unique marketing approaches that increase candidate response rates and overall engagement;
- Utilization of advanced search and sourcing tools that provide access to specialized talent in competitive talent markets;
- Resource scalability that enables the delivery of talent within days not months; and
- Vetting and screening skills that validate and increase the quality of delivered candidates.

The Recruiter's Benefits Analysis includes:

- Exposure to state of the art sourcing and recruiting processes;
- Leverage key processes embedded within your organization like the ATS, background checks, clearance process, etc;
- On demand access to your talent pool at any time;
- Screened and vetted candidates delivered to your team on a daily basis;
- The internal recruiting team can continue managing the standard workload without being overwhelmed; and
- Dramatic costs reductions of 25% and higher due to the scalability of the talent platform.

Return on Investment

Based upon the data, engaging a Surge Recruitment Outsourcing talent platform can provide a sizable return on investment. This is largely realized through additional revenues of \$28k due to the reduction in the average time-to-fill from 42 days to 11 days. This acceleration of 31 days, provides an additional month of employee revenue (SHRM Human Capital Benchmarking Report: \$28k). Additionally, it delivers lower costs per hire of \$1k (\$4k - \$3k = \$1k) and the complete elimination of opportunity costs created by overwhelming the internal recruiting process.
